Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

	Stage 1: Discovery & Inputs	Stage 2: AI Generation & Review	Stage 3: Customization & Export
Actions *What does the customer do?*	• Lands on VoyageAI. • Enters destination, dates, budget, style, and vibe. • Clicks 'Generate Plan'.	• Observes real-time generation spinner. • Reviews multi-day timeline slots. • Validates costs against total budget.	• Modifies activity time/cost in modal. • Re-rolls a single day with AI. • Downloads printer-ready PDF.
Touchpoint *What part of service interacted with?*	• Landing Page Hero. • 3-Step TripBuilder Wizard. • Zustand 'tripStore'.	• FastAPI POST /api/itinerary/generate. • Groq LPU API. • ItineraryView timeline.	• Activity Editor modal. • POST /api/itinerary/day/regenerate. • Supabase PostgreSQL DB. • Print CSS module.
Customer Thought *What is customer thinking?*	• 'I want a plan tailored to my exact budget without commercial tourist traps.'	• 'Sub-second speed! The schedule and location progression look very logical.'	• 'Great that I can edit Day 2 without having to redo the entire trip!'
Customer Feeling *What is customer feeling?*	Curious, optimistic, relieved by quick setup.	Delighted, impressed by the ultra-low latency.	Empowered, organized, confident to travel.
Process Ownership *Who is in lead?*	Frontend UI/UX team & Client validation.	Backend Engineering & Groq AI Pipeline.	Full-stack integration & State synchronization.
Opportunities *How can we improve?*	• Autocomplete city search. • Per-day average cost guidance.	• SHA-256 prompt caching for popular multi-day destinations.	• Weather integration and offline PWA service worker.
