Problem-Solution Fit Canvas

Date	21 October 2026
Team ID	VAI-AI-2026
Project Name	VoyageAI — Personalized AI Travel Itinerary Planner
Maximum Marks	5 Marks

Problem-Solution Fit Framework:

Ensures VoyageAI addresses real root causes, user behaviors, and pain points with measurable solutions.

Customer Problem / Pain Point	Target User Behavior	VoyageAI Solution Feature	Measurable Value / Outcome
Spends 15-20 hours planning across 15+ disparate tabs.	Browses travel blogs, maps, and reviews manually.	Sub-second AI schedule generation via Groq LPU.	Reduces planning time from 20 hours to under 2 minutes.
Pre-packaged tours are rigid, commercial, and generic.	Desires customized spots matching personal vibe & pacing.	3-step vibe selector tailoring morning/afternoon/evening slots.	100% personalized schedule matching budget & vibe.
Budget overruns due to inaccurate expense planning.	Estimates costs in mental math across currencies.	Dynamic budget allocation per activity with currency toggle.	Strict adherence to total budget constraint.
Static itineraries break when weather or one activity cancels.	Scraps entire plan or gets stranded.	Single-Day AI Re-roll & inline activity editor modal.	Instant adaptation without rewriting other days.
