Coding & Solution Implementation

Date	21 October 2026
Team ID	VAI-AI-2026
Project Name	VoyageAI — Personalized AI Travel Itinerary Planner
Maximum Marks	5 Marks

Implementation Details & Technical Verification:

Demonstrates the quality, completeness, and production readiness of the implemented solution.

Component	Implementation Details	Verification Result
AI Parser & Client	httpx async calls to Groq API with 90s timeout and json_object response format.	Sub-second generation; 0 JSON truncation errors.
Async Database Engine	create_async_engine with statement_cache_size=0 for Supabase Port 6543 pooler.	Eliminated asyncpg prepared statement collisions.
Eager Serialization	selectinload across Trip -> Itinerary -> Days -> Activities hierarchy.	Eliminated MissingGreenlet errors in asyncpg.
Vercel SPA Rewrites	vercel.json rewrites directing all routes to index.html.	Zero 404 errors on deep URL page reloads.
